---

### **INTRODUCTION**

PROCOP<sup>®</sup> is a complete computerized records management system for law enforcement agencies. It has been designed to provide maximum power and flexibility at a cost that is affordable to any agency. Historically, a number of software packages have been available for police agencies but the pricing of these packages put them out of reach of smaller agencies. In most cases, complete systems cost \$10,000 or more. PROCOP<sup>®</sup> is priced at \$4,500.00 (or less depending on agency size) for the complete system. There is no additional cost for more users.

### **FUNCTIONALITY**

PROCOP<sup>®</sup> provides the capability to manage information relative to:

- Accidents
- Budget
- Calls For Service
- Citations
- Emergency Notifications
- Employees
- Equipment
- Evidence
- Incident Reports
- Investigations
- Property
- Vehicles
- Warrants

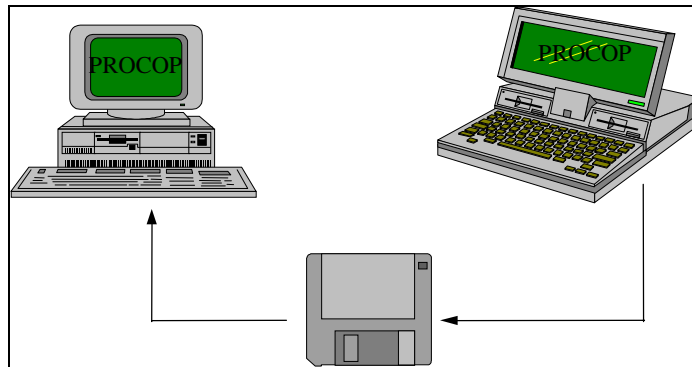

The system gives you the capability to store and readily retrieve this information as well as generate comprehensive statistical reports with both text and graphics.

All Departmental activity is tracked, as is individual officer performance.

PROCOP<sup>®</sup> features internal spell checking capabilities and the ability to link records to Microsoft Word documents. Note: Microsoft Office is required for these features and is not included in the purchase price.

PROCOP<sup>®</sup> also provides the capability to integrate video images which have been scanned or captured with a digital camera with your records.

PROCOP<sup>®</sup> can be used on laptops and portable computers. This feature provides a “scaled down” version of PROCOP<sup>®</sup> which is installed on the laptop or portable computer to be used in the field. Functions are provided to export codes, such as incident codes, employee id’s, etc. to the portable system.

The portable system provides for the entry of incident reports, citations, warnings and field contacts. Once entered, these records can be exported to a diskette then imported into the main system at headquarters.

The entire system is completely configurable to fit your agency. All codes used in the system are changeable by you so you can use your existing coding system for incident types, call types, officer identification, etc. or ours.

All help and documentation is included on-line so there is no need to look up information in cumbersome manuals.

### **TECHNICAL INFORMATION**

PROCOP<sup>®</sup> is a Windows\* based system developed using Microsoft Access\* and requires Microsoft Windows 95, Windows 98 or Windows NT, Windows ME, Windows 2000, Windows XP.

PROCOP<sup>®</sup> runs on single user or networked systems.

Single user PC's or network workstations require a minimum of 16 megabytes of RAM (32 recommended), 150 megabytes of free disk space and Pentium processor (PentiumII recommended).

### **TECHNICAL SUPPORT**

Technical support is available twenty four hours a day, seven days a week to accommodate twenty four hour police operations. Support, after the first year, is \$500.00 per year.

**REDUCED PRICING FOR SMALLER AGENCIES**

The following pricing options are available to make PROCOP® even more affordable:

1-5 Officers	\$2,200.00
6-20 Officers	\$3,500.00
More Than 20 Officers	\$4,500.00
